

Model Sheep

Just like there are dogs of all shapes, sizes and colours, there are lots of types (breeds) of sheep. There are over 60 breeds of sheep kept in the United Kingdom and many more found all around the world. Different breeds might have different types of wool or be better at living in certain places. Many breeds of sheep are named after the places they were first kept.

Can you create a your own model of a sheep? It could be realistic or a creation of your own. Maybe you can think of a name for the type of sheep you create!

Instructions

- 1) Decorate the sheep.
- 2) Carefully cut round the sheep's outline.
- 3) Fold along the dotted lines.
- 4) Glue together the edges of the flaps.
