

Data Set

If practical work has not been completed, please use this example data set to answer questions in the independent task.

Location	Location Description	Water Infiltration Time	Soil Structure Score
1	Centre of a field of wheat. Minimal surface water. The field was direct drilled (ploughing has not occurred for several years).	2 minutes, 12 seconds	2
2	Grassy field edge. Clear that farm traffic uses this area to gain access to the field. Some standing water.	4 minutes, 17 seconds	3
3	Gateway between the milking parlour and large paddock. Lots of mud and standing water.	9 minutes, 12 seconds	5
4	Recently cultivated field. Plough has occurred here to create a new seed bed.	8 minutes, 6 seconds	4
5	Field margin. The margins have been floristically enhanced (wildflowers have been sown as part of a management scheme). No standing water or surface disturbance.	1 minute, 45 seconds	1
